13<sup>th</sup> September 2023

## **DISCLAIMER**

The information contained in this confidential document ("Presentation") has been prepared by Central Asia Metals plc (the "Company"). It has not been fully verified and is subject to material updating, revision and further amendment. This Presentation has not been approved by an authorised person in accordance with Section 21 of the Financial Services and Markets Act 2000 and therefore it is being delivered for information purposes only. Any person who receives this Presentation should not rely or act upon it. This Presentation is not to be disclosed to any other person or used for any purpose.

While the information contained herein has been prepared in good faith, neither the Company nor any of its shareholders, directors, officers, agents, employees or advisers give, have given or have authority to give, any representations or warranties (express or implied) as to, or in relation to, the accuracy, reliability or completeness of the information in this Presentation, or any revision thereof, or of any other written or oral information made or to be made available to any interested party or its advisers (all such information being referred to as "Information") and liability therefore is expressly disclaimed. Accordingly, neither the Company nor any of its shareholders, directors, officers, agents, employees or advisers take any responsibility for, or will accept any liability whether direct or indirect, express or implied, contractual, tortious, statutory or otherwise, in respect of, the accuracy or completeness of the Information or for any of the opinions contained herein or for any errors, omissions or misstatements or for any loss, howsoever arising, from the use of this Presentation.

This Presentation may contain forward-looking statements that involve substantial risks and uncertainties, and actual results and developments may differ materially from those expressed or implied by these statements. These forward-looking statements are statements regarding the Company's intentions, beliefs or current expectations concerning, among other things, the Company's results of operations, financial condition, prospects, growth, strategies and the industry in which the Company operates. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. These forward-looking statements speak only as of the date of this Presentation and the Company does not undertake any obligation to publicly release any revisions to these forward-looking statements to reflect events or circumstances after the date of this Presentation.

Neither the issue of this Presentation nor any part of its contents is to be taken as any form of commitment on the part of the Company to proceed with any transaction and the right is reserved to terminate any discussions or negotiations with any prospective investors. In no circumstances will the Company be responsible for any costs, losses or expenses incurred in connection with any appraisal or investigation of the Company. In furnishing this Presentation, the Company does not undertake or agree to any obligation to provide the recipient with access to any additional information or to update this Presentation or to correct any inaccuracies in, or omissions from, this Presentation which may become apparent.

This Presentation should not be considered as the giving of investment advice by the Company or any of its shareholders, directors, officers, agents, employees or advisers. In particular, this Presentation does not constitute an offer or invitation to subscribe for or purchase any securities and neither this Presentation nor anything contained herein shall form the basis of any contract or commitment whatsoever. Each party to whom this Presentation is made available must make its own independent assessment of the Company after making such investigations and taking such advice as may be deemed necessary. In particular, any estimates or projections or opinions contained herein necessarily involve significant elements of subjective judgment, analysis and assumptions and each recipient should satisfy itself in relation to such matters.

The Company's principal activity is the exploration and mining of precious and base metals in Kazakhstan and North Macedonia. You should be aware of the risks associated with this type of investment and that in emerging markets such as Kazakhstan and North Macedonia, the risks are far greater than in more developed markets (including significant legal, economic and political risks) and that the Company could potentially lose the benefit of its assets in Kazakhstan and North Macedonia. You acknowledge the high number of expenses and difficulties frequently encountered by companies in the early stages of development, particularly companies operating in emerging markets and you should be aware that this may lead to the loss of your entire investment.

Neither this Presentation nor any copy of it may be (a) taken or transmitted into any country, its territories or possessions (each a "Restricted Territory"), where it may be in breach of the laws and regulations of that country; or (b) given to any individual who is a citizen or resident of a Restricted Territory where it may be in breach of the laws and regulations of that country. The distribution of this document in or to persons subject to other jurisdictions may be restricted by law, and persons into whose possession this document comes should inform themselves about, and observe, any such restrictions. Any failure to comply with these restrictions may constitute a violation of the laws of the relevant jurisdiction.

## **H1 2023 RESULTS SUMMARY**

# O1 FINANCIAL RESULTS

## **MARKET CONDITIONS**

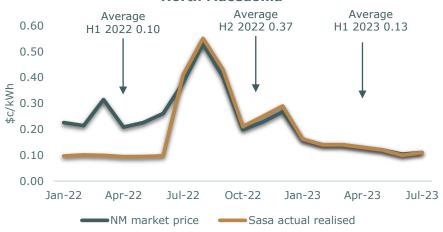

## H1 2023

- Commodity prices adversely affected by:
  - Poor economic performance, consumer confidence and demand from China
  - Increased availability of refined metal
  - Growing recessionary risks, especially in the West
- Treatment charges decreased 6% HoH
- Operating currencies strengthened against the US dollar

|                                       | Cu \$/t | Zn \$/t | Pb \$/t |
|---------------------------------------|---------|---------|---------|
| H1 2023 average price received (\$/t) | 8,668   | 2,662   | 2,051   |
| H1 2022 average price received (\$/t) | 9,557   | 3,679   | 2,174   |
| Change %                              | -9%     | -28%    | -6%     |

- Kazakhstan WHT on intercompany dividend distributions increased from 0% to 10% and MET increased from 5.7% to 8.55% from 1 January 2023
- Inflation rates were 14.6% in Kazakhstan and 13.6% in North Macedonia
- Support provided to site staff via pay rises
- Volatile energy prices, Sasa exposed to spot prices in H1 2023

## Monthly average electricity price - North Macedonia

## **H1 2023 INCOME STATEMENT**

## EBITDA, \$48.9m - margin 49%

- Kounrad Revenue \$54.7m
- Kounrad EBITDA \$39.2m margin 72%
- Sasa Revenue \$44.6m
- Sasa EBITDA \$18.2m margin 41%

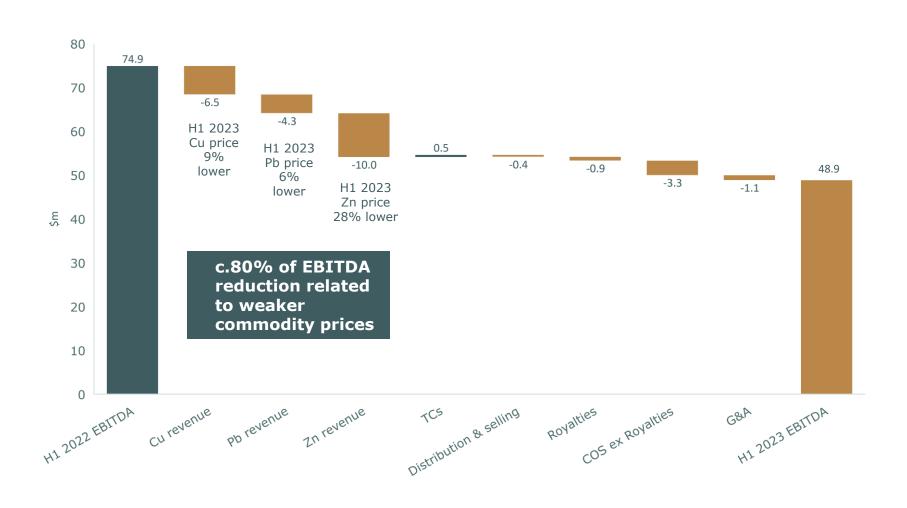

## Profit after tax, \$20.8m

- \$20.2m reduction in gross revenue (17%) metal prices
- \$5.2m increase in cost base power, wages, royalties (c.10%)
- Introduction of Kazakhstan WHT

## **H1 2023 SASA RUN OF MINE COSTS**

## H1 2023 RoM unit cost \$56.2/t

\$10.7/t HoH cost increase, includes:

- Increased labour costs across site, \$4.0/t, agreed pay rises and increase in headcount
- Increase in electricity costs driven by price rises, \$1.5/t
- Increase in external services, mainly drilling costs, \$1.2/t
- Increase in reagents and grinding consumables, \$1.0/t
- Reduction in RoM ore extracted, \$0.8/t
- Realisation costs reduced due largely to treatment charges

FY 2022 RoM unit cost \$55.6/t

H1 2023 adjusted FCF of \$24.1m

# 02 OPERATIONS

## **CAML OPERATIONS**

## **SASA (100%)**

- Underground zinc and lead mine, northeast North Macedonia
- Production commenced in 1960s
- Life of mine to 2039 (reserves and resources)
- H1 2023 production, 9,764t zinc and 13,734t lead
- 2023 production guidance, 19,000-21,000t zinc and 27,000-29,000t lead

## **KOUNRAD (100%)**

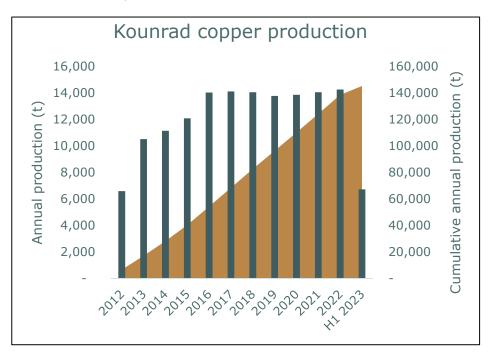

- In-situ dump leach and SX-EW processing facility, central Kazakhstan
- In production for 11 years
- Life of operation to 2034
- H1 2023 production, 6,716t copper
- 2023 production guidance, 13,000-14,000t copper cathode

## **PRODUCTION**

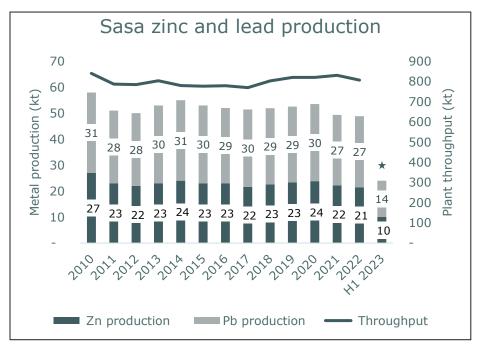

## H1 2023 production

- Copper 6,716t
- Zinc 9,764t
- Lead 13,734t

## On track to achieve full year guidance

- Copper 13,000-14,000t
- Zinc in concentrate 19,000-21,000t
- Lead in concentrate 27,000-29,000t

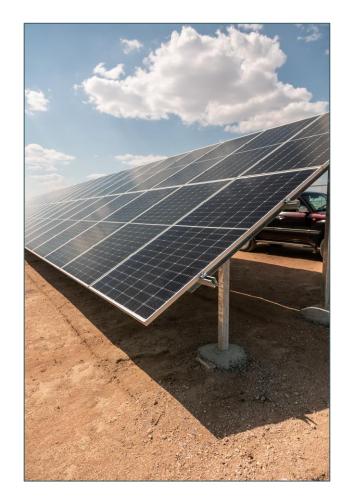

## **INVESTMENT & INNOVATION**

## **KOUNRAD SOLAR POWER PLANT ON TRACK FOR COMPLETION H2 2023**

- Kounrad engineering team well advanced with construction of 4.77MW unit
- All equipment and materials delivered to site
- 78% of installation works now complete
- CAML on track for H2 2023 completion of project
- Solar Power Plant to provide 16-18% of Kounrad's electrical power needs and reduce Kounrad's Scope 1 and 2 GHG emissions by c.10% versus 2020
- Capital cost expected to be below \$5m

## **INVESTMENT & INNOVATION**

## TRANSITION TO PASTE FILL MINING AT SASA

## Paste Backfill (PBF) Plant

- Construction of PBF plant materially complete
- Commissioning well underway
  - thickened tailings have now been introduced to the PBF plant and deposited underground
- 4.5km of reticulation pipework in place to pump paste underground
- Additional voids to store paste have been identified at Svinja Reka (i.e. tailings storage)
- First paste placed operationally underground on track for H2 2023

## Transition to paste fill mining

- Paste fill mining method to be initially undertaken on 800m level
- Waste development in preparation for paste fill mining well advanced
- 6 new faces designed, ore development expected in this area in the next month
- Extraction of ore by paste fill mining method on track for H2 2023

## **INVESTMENT & INNOVATION**

## TRANSITION TO PASTE FILL MINING AT SASA

## **Central Decline**

- 4.5m x 4.5m decline providing more efficient access and improved ventilation
- Decline development totalling in excess of 2km was from surface and 910m level
- Tunnels connected in Q2 2023
- Central Decline now operational, haulage of ore and waste underway

## **Dry Stack Tailings (DST)**

- DST Plant project construction has commenced
- Automation and electrical work will extend into H1 2024
- DST landform construction to commence H2 2023

## **SUSTAINABILITY - STRATEGY AND** H1 2023 PROGRESS

| SUSTAINABILITY<br>PILLAR   | 2023 AND / OR LONG-TERM TARGET   |
|----------------------------|--|
| DELIVERING VALUE           | Zero human rights abuses   |
| THROUGH<br>STEWARDSHIP     | Implement Group-wide supplier screening platform by 2025   |
| MAINTAINING                | Zero fatalities  |
| HEALTH & SAFETY            | Lost time injury frequency rate ('LTIFR') target for 2023 below 1.30 20% female interviewees for each eligible role from 2023 onwards    |
| FOCUSING ON OUR PEOPLE     | 25% increase in female employees on a Group level by end 2025  |
|                            | Maintain 99% local employment across both operations Zero severe or major environmental incidents  |
| CARING FOR THE ENVIRONMENT | 50% reduction in Group greenhouse gas ('GHG') emissions by 2030 and net zero by 2050   |
|                            | 75% reduction in surface water abstraction at Sasa by end of 2026  |
|                            | 70% of tailings at Sasa to be stored in a more environmentally responsible manner (paste backfill and dry stack tailings) by end of 2026 |
|                            | Report Group Scope 3 emissions by end of 2024  |
|                            | Report to Global Industry Standards on Tailings Management ('GISTM') by end of H1 2024   |
| UNLOCKING                  | Zero severe or major community-related incidents   |
| VALUE FOR OUR COMMUNITIES  | Increase level of community support to an annualised average of 0.5% of Group gross revenue (up from 0.25%)                              |

## During H1 2023, CAML

- Published 4th Sustainability Report
- Published 2<sup>nd</sup> Climate Change Report
- Became an official TCFD 'supporter'
- Submitted its first disclosures to CDP

## **SUSTAINABLITY AT KOUNRAD**

## **Kounrad H1 2023 Sustainability Activity**

- Solar Power Plant investment of c \$5m
- 100% local employment
- No LTIs at Kounrad since May 2018
- Development of long-term community investment strategy
- Funding to the Foundation increased from 0.25% to 0.5% of revenue
- The Kounrad Foundation key activities:
  - Tuition funding for local medical students
  - Donation of gynaecological equipment, which has, in three months, performed 150 surgeries, saving eight hours travelling to larger hospitals for local women
  - Provided 20 computers for the IT class at the Medical College

KOUNRAD

<sup>1</sup> Since 2012 <sup>2</sup> average 2022 <sup>3</sup> in 2022

## **SUSTAINABILITY AT SASA**

## Sasa H1 2023 Sustainability Activity

- 100% renewable energy supplied in H1 2023
- 98% local employment, 9% increase in female employment vs 2022
- Sustainable economic development plan Phase 1 underway
- Funding to the Foundation increased from 0.25% to 0.5% of revenue
- The Sasa Foundation key activities:
- 11 scholarships for mining students
- Procurement of sports equipment to enable inclusion of all students in sports
- Support of secondary students' study tour

<sup>1</sup> Since Nov 2017 <sup>2</sup> average 2022 <sup>3</sup> in 2022

03

CAPITAL ALLOCATION/ OUTLOOK

## CAML BUSINESS DEVELOPMENT STRATEGY

## Type of opportunity

- Earlier stage exploration opportunities largely in our local jurisdictions
- Transformational and accretive transactions, most likely 'in production' acquisitions to enhance scale and liquidity
- Ad hoc 'overlooked' opportunities

## **Jurisdiction**

 European time zone plus Kazakhstan (selected African countries)

## Sustainability

 Acquisition opportunities must not negatively impact the Company's sustainability position for the long term

## **Affordability**

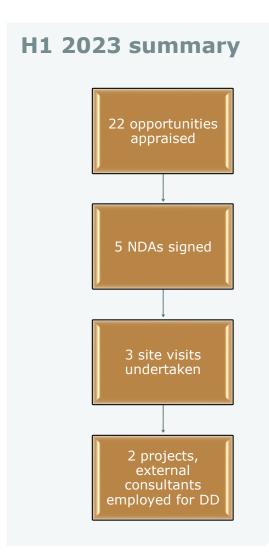

- CAML's strong balance sheet
  with no debt and strong cash
  generation from existing
  operations means that the
  Group has considerable
  borrowing capacity to enable a
  strong cash element to any
  offer
- Good liquidity and strong shareholder support for future deals

## **Accretion**

- Must add value for shareholders

# **Attractive commodity exposure**

 Our metal focus should fit in with our purpose, which remains to produce base metals essential for modern living

## **BUSINESS ARRANGEMENT WITH TERRA EXPLORATION**

## **EARLY-STAGE EXPLORATION IN KAZAKHSTAN**

- CAML entered into an arrangement with Kazakh explorers, Terra Exploration
- Terra comprises early-stage exploration geologists with significant Kazakhstan experience
- Terra reviewing targets using historical data and its advanced database
- Applications for exploration licences in Kazakhstan have been made
- 2023 budget c.\$1m
- CAML has formed NewCo (CAML Exploration Ltd) in AIFC
  - Will be owned 80% by CAML and 20% by Terra
  - Longer term, on meaningful exploration success, wholly-CAML owned company with NSR-style royalty arrangement for Terra

# BUSINESS DEVELOPMENT - ON A PLATFORM TRUSTED TO CREATE STAKEHOLDER VALUE

## **DIVIDENDS PAID TO SHAREHOLDERS SINCE 2012 OF \$318.8M**

## **Kounrad**

- Equity investment of \$60m
- Total capex and innovation invested of \$85m
- Revenue generated during 11 years \$999m
- EBITDA generated of \$731m
- Tax paid in Kazakhstan of \$247m

## Sasa

- Equity investment of \$204m
- Debt repaid in under 5 years
- Capex and innovation of \$65m
- Revenue generated during 5+ years of \$570m
- EBITDA generated of \$320m
- Tax paid in North Macedonia of \$79m

2023 interim dividend 9p

# CAML trusted to find the right deal

- Copper Bay minimal investment of \$6m and a decision made that returns were limited from CAML perspective
- Shuak minimal investment of \$2m and a decision made that resource potential was too small for CAML
- CAML has raised a total of \$264m from the market, returning over \$318.8m
- 100s of opportunities appraised in active BD effort

CENTRAL ASIA METALS PLC | H1 2023 RESULTS PRESENTATION | SEPTEMBER 2023

## **SUMMARY AND OUTLOOK**

## A strong balance sheet

- Dependable financial performance
- Sector-leading dividend yield
- Producing the metals essential for modern living safely and sustainably

## **Capital allocation priorities**

- H1 2023 dividend, 9p
- Investment in the business
- Looking for growth opportunities

## H2 2023 outlook

- On track to achieve 2023 full year guidance
- PBF Plant fully operational
- Transition to paste fill mining methods
- Construction of Kounrad Solar Power Plant completion
- Construction of DST plant well advanced

## **COPPER - SUPPLY DEFICIT REMAINS**

## Early 2023 optimism slows

 Since reaching a high of more than US\$9,000/t, copper prices have decreased, but remain relatively stable above the US\$8,000/t mark in recent months

## Supply constraints persist, supporting prices

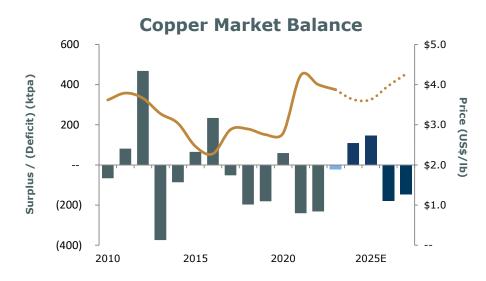

- Demand remains muted, supply side continues to lag, inventory levels continuing to be depleted
- Medium-term, market will see a period of surplus and reduced prices
- Shortfall anticipated to emerge from 2026 due to scarcity of new large copper projects, pushing prices higher in long-term

## Macro conditions continue to prove favourable

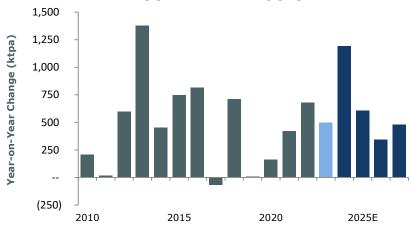

- Copper maintains a key role in the energy transition
- Demand continues to grow for EV batteries and other clean technologies (Consumption growth expected to be 2.3% p.a for refined copper and 2.6% p.a for total copper)

## **BMO Copper price outlook**

- 2023: US\$3.88/lb (down by 2%)
- 2024: US\$3.63/lb (no change)
- 2025: US\$3.63/lb (no change)
- 2026: US\$3.97/lb (no change)
- LT: US\$3.95/lb (no change)

## **Global Copper Mine Supply Growth**

## ZINC - TIGHT MARKET DESPITE DEMAND WEAKNESS

## Zinc market to see slight uptick in supply

- Zinc prices retraced, hitting high in January, recording lowest levels in May, just above US\$2,200/t
- Prices to remain under pressure, demand expected to be soft for year, coupled with modest surplus in supply

## **Global demand dampens prices**

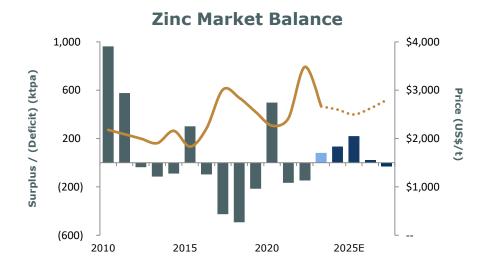

- In the U.S., manufacturing PMI and Architectural Billings Index still remain in contractionary territory
- Similarly in Europe, weakness in construction and manufacturing

## Challenges in the mid to long-term outlook

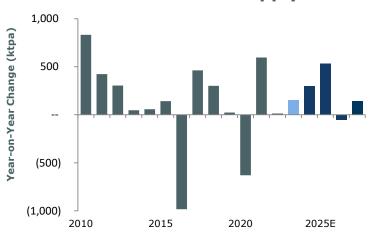

- The medium-term outlook for zinc price contingent on inflation levels and strength of dollar
- Zinc consumption expected to increase 2.0% p.a in next 10 years, although supply will start to contract after 2026 through 2050 as operations start to dwindle with focus still on copper/lithium
- BMO comment: zinc starting to trade into top end of its mine cost curve. Evidence seen with Boliden announcing Tara will be placed under care and maintenance until further notice

## **BMO Zinc price outlook**

- 2023: US\$1.21/lb (down by 12%)
- 2024: US\$1.18/lb (no change)
- 2025: US\$1.13/lb (no change)
- 2026: US\$1.19/lb (no change)
- LT: US\$1.21/lb (no change)

## **Global Zinc Mine Supply Growth**

# LEAD - IMPROVING SUPPLY TO PRESSURE NEAR-TERM PRICES

## Lead prices stabilise with market tightness to ease

- Lead ("LME") prices retraced since hitting high in December 2022, but remain relatively stable above US\$2,000/t so far this year due to robust auto sales and shuttered capacity outside of China
- The commissioning and restart of number of mines and smelters globally (e.g. Dugald River, Ozernoe, and Stolberg) in the nearterm should help support primary refined lead production through H2 and into next year

## Stable but slow uptrend in years to follow

- Prices expected to remain stable as weak production in the U.S. and Europe are offset by international exports from China, sustained by continued weak demand for lead domestically in country
- Over long-term, lead demand expected to surpass supply
- Lead increasingly adopted as an alternative in EV transition to lithium and cobalt due to constraints in supply
- BMO forecasts average lead deficit of 59,000t in next 10 years compared to 38,000t average surplus in previous decade

## **BMO Lead price outlook**

- 2023: US\$0.95/lb (1% change)
- 2024: US\$0.91/lb (11% change)
- 2025: US\$0.82/lb (6% change)
- 2026: US\$0.73/lb (no change)
- LT: US\$0.73/lb (no change)

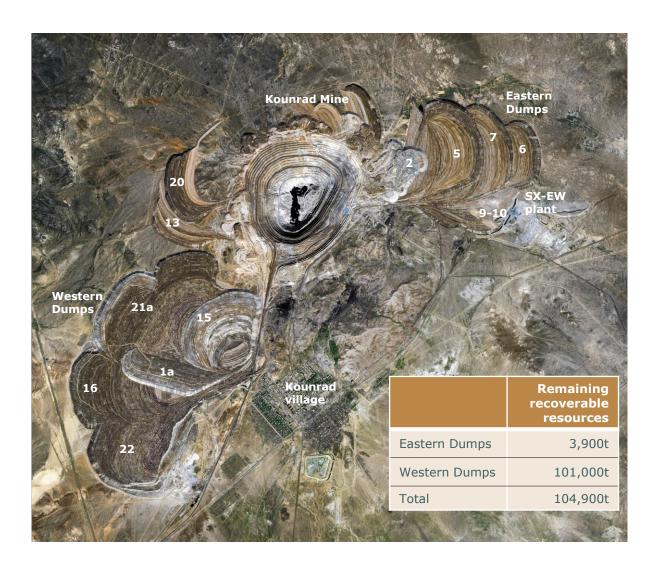

## **Weekly Exchange Lead Inventories**

# KOUNRAD PROJECT COPPER | CAML

## **KOUNRAD COPPER OPERATION**

#### HOW WE PRODUCE COPPER

#### IRRIGATION

Irrigation of dumps

#### LEACHING

Leaching of copper into PLS solution

#### EXTRACTION

Extraction of copper from PLS

#### STRIPPING

Stripping of copper from organic solution

#### ELECTRO-WINNING

Electro-winning of copper from electrolyte

#### COPPER CATHODE

Production of copper cathode

## SASA LEAD & ZINC | CAML

## SASA ZINC AND LEAD MINE

- Skarn hosted deposit in North Macedonia
- Sub-level caving operation, transitioning to paste fill method this year
- Reserves and resources to 2039

#### HOW WE PRODUCE ZINC AND LEAD

#### MINE

Sub-level caving underground mine with ore transported to surface by shaft (70%) and by truck (30%).

#### CRUSH AND SCREEN

Jaw and cone crushers.

#### MILL

Rod mills, spiral classifiers and ball mills. Ore milled to c.74 microns.

#### FROTH FLOTATION

Two concentrates produced – lead containing silver, and zinc.

#### REMOVE MOISTURE

Thickened and pressed to de-water.

#### STORAGE

Saleable concentrate products stored in sheds awaiting loading.

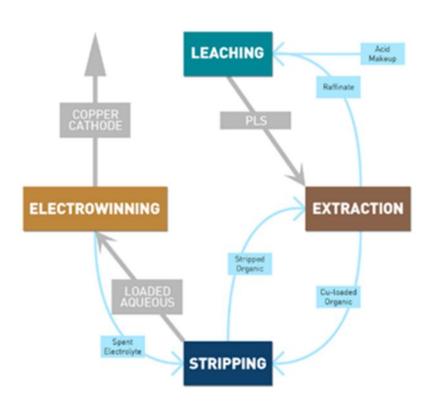

#### TO MARKET

Concentrate trucked to smelters.

## MINERAL RESOURCE ESTIMATES FOR SVINJA REKA AND GOLEMA REKA - SASA

Sasa's technical services team has updated the Mineral Resource Estimate ('MRE') for the Svinja Reka deposit as of 31 December 2022. The Golema Reka MRE was updated on 1 January 2020.

| Classification                         | Deposit         | Mt   | Pb (%) | Zn (%) | Ag(g/t) | Pb (kt) | Zn (kt) | Ag(koz) |
|--|-----------------|------|--------|--------|---------|---------|---------|---------|
| Indicated                              | Svinja Reka     | 10.3 | 4.5    | 3.0    | 31.6    | 459     | 306     | 10,499  |
| Mineral                                | Golema Reka     | 1.3  | 3.8    | 1.6    | 13.0    | 48      | 20      | 528     |
| Resources                              | Total Indicated | 11.6 | 4.4    | 2.8    | 29.5    | 509     | 327     | 11,042  |
| Inferred                               | Svinja Reka     | 2.0  | 2.9    | 2.4    | 21.6    | 56      | 47      | 1,354   |
| Mineral                                | Golema Reka     | 6.3  | 3.5    | 1.4    | 12.0    | 217     | 86      | 2,444   |
| Resources                              | Total Inferred  | 8.3  | 3.4    | 1.6    | 14.3    | 273     | 133     | 3,798   |
| Total Indicated and Inferred Resources |                 | 19.9 | 4.0    | 2.3    | 23.2    | 782     | 460     | 14,840  |

#### Notes

- Mineral Resources have an effective date of 31 December 2022.
- The Competent Person for the declaration of Mineral Resources is Graham Greenway, BSc.Honours (Geology), PGeo. Graham Greenway, CAML's Group Geologist, is a Practising Registrant of the Professional Geoscientists of Ontario and has over 34 years' experience in the exploration, definition and mining of precious and base metal Mineral Resources, and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration, and to the type of activity which he is undertaking to qualify as a 'Competent Person' as defined by JORC and as required by the June 2009 Edition of the AIM Note for Mining and Oil & Gas Companies. He has reviewed, and consents to, the inclusion in the Annual Report of the matters based on their information in the form and context in which it appears and confirms that this information is accurate and not false or misleading.
- Mineral Resources are reported inclusive of Ore Reserves.
- The Svinja Reka Mineral Resource is reported based on a NSR cut-off of \$46/t for Sub Level Caving and \$53/t for Cut and Fill and Long Hole Stoping and are based on metal price assumptions of \$2,755/t for zinc, \$2,290/t for lead and \$22/oz for silver.
- The Golem Reka Mineral Resource is reported above a cut-off grade of 2% combined lead and zinc.
- Mineral Resources are reported as undiluted. No mining recovery has been applied in the Statement.
- Tonnages are reported in metric units, grades in percent (%) or grams per tonne (g/t), and the contained metal in metric units or ounces. Tonnages, grades, and contained metal totals are rounded appropriately.
- Rounding may result in apparent summation differences between tonnes, grade and contained metal content.

## **SVINJA REKA ORE RESERVE STATEMENT**

The following Ore Reserve Statement has been prepared by Sasa's technical services team based on a Life of Mine ('LoM') plan that includes a transition from the Sub Level Caving mining method to Cut and Fill as well as Long Hole Stoping with paste backfill. The Ore Reserve Statement considers the updated Indicated Resources constrained within a practical and economic mine design only. Net Smelter Return ('NSR') cut-off values and design modifying factors for each mining method were applied as follows:

- Sub Level Caving
  - NSR Cut-Off Value = \$46/t
  - Planned Dilution 25%
  - Mining Recovery 85%
- Cut and Fill
  - NSR Cut-Off Value = \$53/t
  - Planned Dilution 5%
  - Mining Recovery 98%
- Long Hole Stoping
  - NSR Cut-Off Value = \$53/t
  - Planned Dilution 17.4%
  - Mining Recovery 90%
- Ore Development
  - NSR Cut-Off Value = \$37/t
  - Planned Dilution 5%
  - Mining Recovery 98%

|             |     |        | Grades |         | Cont    | ained me | tal      |
|-------------|-----|--------|--------|---------|---------|----------|----------|
| Svinja Reka | Mt  | Pb (%) | Zn (%) | Ag(g/t) | Pb (kt) | Zn (kt)  | Ag (koz) |
| Probable    | 8.8 | 3.9    | 2.6    | 27.0    | 346     | 232      | 7,662    |
| Total       | 8.8 | 3.9    | 2.6    | 27.0    | 346     | 232      | 7,662    |

#### **Notes**

- Ore Reserves have an effective date of 31 December 2022.
- The Competent Person who has reviewed the Ore Reserves is Scott Yelland, C. Eng, FIMMM, MSc, who is a full-time employee and Chief Operating Officer of CAML. He is a mining engineer with over 38 years' experience in the mining and metals industry, including operational experience in underground zinc and lead mines, and as such qualifies as a Competent Person as defined in the JORC Code (2012).
- The Ore Reserve is reported using a NSR cut-off of \$46/t for Sub Level Caving, \$53/t for Cut and Fill and Long Hole Stoping and \$37/t for Ore Development drives that are required to establish stope access and are based on metal price assumptions of \$2,395/t for zinc, \$1,992/t for lead and \$19.3/oz for silver.
- Rounding may result in apparent summation differences between tonnes, grade and contained metal content.
- The Mineral Resources and Ore Reserves are reported in accordance with the guidelines of the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the 'JORC Code').
